Main Street, Next to Ball's Drug Store.

## REBELLIOUS YAQUIS GET ENCOURAGEMENT FROM CIENTIFICOS

The Cientifico element expelled from Sonora by the Constitutionalists, together with the Maytorena adherents who make their headquarters in

Los Angeles, Cal., are inciting the Yaqui Indians to remain in the field against the de facto government of Mexico, according to consular advices received from Hermosillo by Ivas G. Leleuier, Mexican consul in Douglas. In support of this contention, it is reported that the Yaquis were the retainers of the Maytorena faction in the inter-republican warfare in Sonora, remaining with him until the former governor was forced to escape across the border. They then took to the hills.

## Your Suit

that's made for you is your suit—and for that reason looks better, feels better, wears longer than one you merely buy. So don't merely buy clothes. Have them made for you, that's the way the men do, who really care for their appearance.

Allen Block. Phone 140.

A large majority of the Yaquis now fighting in the ranks of the Bronchos are said to have served at one time or another in the ranks of Maytorena's army.

The first considerable skirmish of several weeks occurred Monday night at Sierra de la Palma, 25 miles west of Torin, according to this advice. A command of government troops under Colonel Jesus Akure, well-known in this city, surprised a large band of raiding Yaquis who had been pursued for more than two weeks. A number of prisoners were captured, while horses, saddles and other loot taken in the recent Yaqui raid on the village of San Fernando, were recovered. Ranchers and other civil elements of southern Sonora are offering their services to the government to engage in the Yaqui campaign, which is considered quite the most encouraging feature or recent weeks.

The case of the Yaqui raiders resulted in a number of them being driven north and it is believed that these were forced over the international boundary, taking refuge in Arizona, there to await a favorable opportunity for again going southward to join their Broncho brethren.

## MINE ACTIVITY INCREASED IN COUNTY

Continued from page 1. Mining Section considerable attention attracted to the district and parties are figuring on options on other properties in the district.

P. J. McCarthy has a bond and option on the property of George McCarthy and Mrs. Igo and has already taken out nearly a car load of good shipping ore.

A Mexican came into Tombstone early last week and brought in a number of pieces of decomposed lime in which were little streaks of native copper. He said that he had found the pieces scattered on the ground in several places on the west side of the mountains. Parties there became interested and have gone out to prospect the country on that side of the mountains.

The Tungsten company, who is working the Gordon property, which it has under bond and option, has taken out considerable ore and has made one or two shipments. They expect to install a concentrator before making any more shipments.

In the Dragons. The Middle Pass country at the present time is attracting considerable attention. The Middle Pass Mines company which was recently incorporated by Bisbee parties and of which L. J. Overlock is president and O. W. Wolf secretary and treasurer, is the owner of twelve claims in the Middle Pass par which includes the old Martin claims, which were the oldest in the district, being located by Martin in 1883 and were being developed by him at the time he was killed by the Apache Indians in 1884. The property is a lead, zinc and silver proposition.

Large bodies of ore occur on the surface. There has been no great depth sunk on any of the various ledges by the company has now started work on a new shaft which will be used as a working shaft and which will be sunk to a depth of 400 feet. In this shaft which is now down only fifteen feet a body of exceptionally rich ore has been uncovered which gives all indications of being the apex of a large body of ore. A hoist is to be installed on this shaft and a concentrator erected to handle ore and an oil flotation plant is also contemplated as samples of the ore that have been tested by that method gave most excellent results. The company has a small force of men at work at the present time but expects during the next few weeks to increase that force. The property lies between the Black Diamond and the Middle March properties.

Joe Muhlen and Charlie Jones, of Bisbee, are getting ready to resume active operations on the Grant property on Zinc Flats. They have already opened up several bodies of good zinc ore and have, out several hundred tons on the dumps.

The Gordon property, in the same district, is idle at the present time but California parties are trying to secure an option on the same and will have parties out to examine it in the near future.

The Old Black Diamond property has been examined recently by several mining experts who are said to be in the employ of the Lewissons. They have made a most thorough examination and it would not be much of a surprise to see that old property again resume shipments.

A number of leasers are at work on the Middle March property and are shipping a car a week to the smelters at Douglas. The ore is hauled to Pearce.

At the Old Copper King property, near the South Pass, some work is being done by the present owners and several tons of good grade copper ore taken out and shipments will be

started soon to the Douglas smelters. The ore will be hauled to Courtland.

At Gleason. The Shannan company has resumed operations and has begun regular shipments to the smelters at Clifton after several months shut down on account of the strike. The force of men at work at present is not as large as it was before the shut down, but the number is being increased almost daily.

The Tejon company still has a few men at work completing the annual assessment work for last year and this year and a small force may be continued to do some further development work at the work done recently by the miners has opened up several bodies of a shipping grade of copper ore.

Paddy Brannon is doing considerable work on his properties and is taking out several cars a month that is being shipped to the smelters at Douglas.

Mike Marchella, who has a lease on the Warnock property, is meeting with good success and is receiving excellent returns from the shipments that he has made to the smelters.

Mike Connors is about to make a deal on a part of his claims with eastern parties who have been out and examined the ground the past few weeks. Should the deal go through he will realize a nice little sum and the camp made better by the employment of a number of men.

There are a number of other deals talked of and numerous parties of engineers have been going over various properties in the district. It is rumored that Harry Macia, of Tombstone, has secured a lease on a part of the Costello claims and will begin work at once.

At Courtland. Once more Courtland is on the upgrade. Since the first of the year, the number of men engaged in and about the camp, has nearly doubled, making a very noticeable change.

With the commencement of work by the Leadville company, the camp was improved considerably, and when President Holmes of that company began granting leases to the different parties another improvement was noted.

A glance at the hillside below the No. 1 shaft of the Leadville company, reveals the presence of a number of windlasses, where there are men working on leases but recently acquired, though there are several tons of ore ready for shipment. On that particular hillside there are no less than 16 men busily working; across the gulch, above the No. 1 shaft, four others are working; in the Silverton shaft of the same company, a lease is being worked and two others are working a lease near the Maid of Sunshine, where the company has 16 men employed. On the Chico, a fraction lying between the Leadville group and the great Western property, the owners are piling good ore on the dump.

Aside from the work being done on the Leadville group, there are the many leasers that are operating on the ground of the Great Western company, as they have been doing for the last two years.

Those securing leases on the Leadville ground, have secured terms that are considered good, and as nearly everyone has opened up ore in the few days in which their leases have been in effect, there will soon be additional shipments of ore aside from the increased shipments by the company; now that the steam hoist has been installed.

At Pearce. The Commonwealth company has been running at full capacity and the mill turning out the usual shipments of bullion. Considerable development work is being done and new ground opened up in the section in which the last big ore body was uncovered.

At the Extension property work has been resumed after a forced shut down on account of the lack of fuel. The work of drifting on the 250 foot level of the Rainbow shaft still continues and it is understood that the force of men employed is soon to be increased. It is reported that a connection is to be made with the old shaft on the south side of the hill so as to make a good air connection and the old shaft will be used as a working shaft as it is in much better location for the handling of the ores and supplies than the present Rainbow shaft. It is expected that before many weeks this work can be accomplished and the machinery on the old shaft again put in use.

From present indications it will not be long before the Extension will become a steady producer. The stockholders throughout the county are greatly pleased with the showings recently made and are holding on to their shares with a view of the price advancing in the near future.

At Johnson.

This camp has increased the tonnage of its shipments since the first of the year very materially and the present price of copper has urged all of the companies to push the work as rapidly as possible. There is more money coming into the camp for returns on ore at the present time, than at any time since the camp was discovered. There are also more men at work now than at any time in the history of the camp. All of the properties are working full capacity and new ground opened up and more men put to work as soon as room is made.

Work on the Chemical company plant where the concentrator is turning out tungsten still continues. The company is developing or opening up

To you this secret we confide  
Improve your Hair with

## HERPICIDE

The value of Newbro's herpicide for saving and beautifying the hair is a secret known to thousands. More men and women probably have obtained positive results from the intelligent use of Herpicide than from all other hair remedies combined.

In the majority of cases it is dandruff contagion that makes the hair dull, brittle and lusterless, followed later—cures this enemy of beauty and (except in cases of chronic baldness) enables the hair to resume its natural luster and luxuriance.

Discriminating persons speak of Newbro's Herpicide in the highest terms for its almost magical effect upon the scalp and also for its excellence as a regular hair dressing. Just begin the use of Herpicide without anyone's knowledge and see how quickly your friends will notice the improvement in your hair.

Send 10 cents in postage or silver to The Herpicide Co., Dept. 120-B, Detroit, Michigan, for trial bottle and booklet. Sold and guaranteed at all toilet goods counters. Accept only genuine Herpicide. Applications at the better barber shops.

considerable new ground and has found several small bodies of ore. The company has begun the purchase of tungsten ores from other parties in this locality that have been opening up their claims, and with the market close at hand a number of individual owners are getting excellent results from their claims. The present demand for the ores has sent the price upward and they are receiving more for the ores than at any time since the property has been worked.

In the Chiricahua. Mining properties in the Chiricahua mountains south of San Simon are in greater demand now than at any time previous in nine years. This applies to lead-silver claims as well as copper properties, and the high prices of all metals in the cause. Mining men say that almost any ore will pay to ship now, the only question being the quantity.

The King of Lead, an old producer, was examined last week by John H. Leavelle, a Utah mining expert, acting for clients. This group, which is near the head of Wood canyon, has been known as a good leasing proposition, several cars of ore having been shipped profitably. The values carried are principally lead, silver and gold.

The old Cochise concentrator has been overhauled and a new table added, and a test is being made of the lead-silver from the Hancock-Welch group, just above the concentrator. J. T. Anderson is operating the latter property, several men being employed. If the test is successful, the concentrator will go forward in regular shipments.

R. D. Hall has four men at work on the Paradise Development copper claims near the Paradise road. He reports 30 inches of rich copper ore in a 50 foot incline, and says that he intends to make shipment, as the vein is widening and looking very promising.

Mr. Hall also reports the striking of eight feet of lead-silver ore in the lower tunnel on the Turkey creek property, one mile north of Paradise. This has always been known as a splendid property, having, probably, as good a showing of that class of ore as there is in the district and one that would do credit to any camp.

R. C. Baumeister, operating the Doran zinc property which now seems to be running a good deal to copper, is this week breaking into an old ore vein, and good results are hoped for. He has already shipped two cars of ore. Recent visitors to the Hilltop, the Hands Bros. property, think that it has entered the class of mines, much ore having been blocked out in a tunnel on the 1200 level by power drills. The group is well named, being in elevation the highest property in the Chiricahua mountains (about 8,000 feet) and by many thought to be the key to the district. In hundreds of places ore is shown on the surface, and in all openings it has been proved to go down with depth. Several thousand feet of work has been done on this group.

Tailings. Guy C. Welsh as administrator of the estate of Thos. London, deceased, has filed a petition with the superior court asking that he be allowed to sell at private sale the Union mine in the Tombstone district. The petition will be heard on Saturday, Feb. 25th.

C. E. Bolton, as administrator of the estate of George E. Cummings, has advertised for sale the undivided one third interest of the estate in, and 13 mining claims in the Turquoise

district. Bids will be received for the same up and including the 15th day of February.

George Moran has filed a lien against the property of the Cochise Queen Mining property in the Warren District consisting of nine claims to secure the sum of \$545 which he alleges to be due him from the company.

George M. Cosby, the well known mining man who has large interests in the Paradise District, has recently secured from the United States government a patent to the Saddle Mining claim in the California Mining District, which is the name given to the mining district in the vicinity of Paradise.

William M. Walker has disposed of an undivided one third interest in the Little White and Walkover mining claims in the Turquoise District to P. J. Latimer. The consideration is given at \$10.00.

H. B. Kenrick and L. C. Gonzales have sold an undivided one fourth interest in the North Star, Bull Dog, No.

1, 2, 3, 4, 5, and 6 to Fred Sutter. The claims are located in the Warren District and the consideration is given at \$10.00.

Charles A. Fair has disposed of an undivided one fourth interest in the claims in the Warren District to Allen D. Fair. The consideration is given at \$10.00.

For a consideration of \$250.00 Tom Stafford has sold to C. W. Boswell a half interest in his lease on a part of the Irish Mag claim in the Warren mining district.

R. H. Whiteside has assigned all his interest in a lease on a part of the Irish Mag claim to Roger Pelton, Robert Ferguson and John M. McGregor. All parties are residents of the Warren District. There is no consideration given.

William Mitchell has conveyed to the Western Finance company a group of thirteen claims in the Tevis Mining District which includes the country in the vicinity of old Ft. Bowie, for a consideration of \$1.00.

## Health for Sick Women

For Forty Years Lydia E. Pinkham's Vegetable Compound Has Been Woman's Most Reliable Medicine—Here is More Proof.

To women who are suffering from some form of woman's special ills, and have a constant fear of breaking down, the three following letters ought to bring hope:—

Pinkham remedies.—Mrs. MAYME ASBACH, North Cranston, Wis.

### Testimony from Oklahoma.

Lawton, Okla.—“When I began to take Lydia E. Pinkham's Vegetable Compound I seemed to be good for nothing. I tried easily and had headaches much of the time and was irregular. I took it again before my little child was born and it did me a wonderful amount of good at that time. I never fail to recommend Lydia E. Pinkham's Vegetable Compound to ailing women because it has done so much for me.”—Mrs. A. L. McCASLAND, 309 Hove St., Lawton, Okla.

### From a Grateful Massachusetts Woman.

Roxbury, Mass.—“I was suffering from inflammation and was examined by a physician who found that my trouble was caused by a displacement. My symptoms were bearing down pains, backache, and sluggish liver. I tried several kinds of medicine; then I was asked to try Lydia E. Pinkham's Vegetable Compound. It has cured me and I am pleased to be in my usual good health by using it and highly recommend it.”—Mrs. B. M. OSOON, 1 Haynes Park, Roxbury, Mass.

If you want special advice write to Lydia E. Pinkham Medicine Co. (confidential) Lynn, Mass. Your letter will be opened, read and answered by a woman and held in strict confidence.
